

INSTRUCTIONS

Print and cut out the AR marker (B/W works fine)

Place the printed marker in front of chest and view through device's camera (only rear camera available at this time)

Tap the screen to reveal toggle buttons for additional viewing options: Horror, Valentine, X-Ray

SUGGESTIONS

Attach printed marker to a string or trade show badge to hang around the neck

Print the marker on iron-on transfer paper to create an AR T-shirt

HeartCam works best in good light with a flat marker
